Protect Yourself and Others From Identity Theft And Fraud
Shredding documents isn't just an easy way to dispose of unwanted documents; it's a big help in protecting yourself from one of today's most invasive crimes - identity theft. Identity theft is one of the most common types of fraud. Identity theft is much more than the misuse of a Social Security number-it can also include credit card and mail fraud. 'Dumpster divers' are taking advantage of carelessness and the relaxed "that'll never happen to me" attitude. It's as simple as this… Thieves can't steal what they can't read!

Keep Your Business Materials Confidential
When it comes to the confidential matters of your company, you can never be too safe! Every business owner should take every precaution possible to ensure all confidential materials are totally destroyed to minimize the chance of a security breach or corporate espionage.

Deter. Detect. Defend.
For more information about protecting your identity please visit ftc.gov/idtheft.
